GIVE YOUR SOILS THE ADDED ADVANTAGE

## REVIVE BLENDED WITH DARRIMAN LIME

### Product Overview:

Perfect for the farmer who wants to improve the quality of their soils. As the product contains Darriman Lime as well as Revive Compost, it is designed to increase your soils ability to unlock nutrients and increase it's pH and calcium levels. With annual applications at 15% it will maintain the soils calcium levels and pH throughout the year.

### Ideal Use:

Ideal for all types of pastures and crops. Can be applied on the surface or incorporated within the soil and can be used as a replacement to lime at higher % levels. Great at the lower % rates for annual application as over time the soil will get its full requirements of lime.

Product Name	Typical Analysis @ 1 t/Ha				Recommended Spread Rate	Lime Kg/Ha	Revive Kg/Ha	Typical Applied Analysis @ Rec Rate

## REVIVE BLENDED WITH UREA & HIGH LEVELS OF SOP FINES

### Product Overview:

The Revive Dairy Gold is designed to apply all the pastures nutrient requirements in one application. With the incorporation of urea and high levels SOP, it provides instantly available nitrogen and potassium as well as the benefit of long term release of nutrients. This blend will provide near instant results and will generate increased growth rates and lush green pastures within a short time frame.

### Ideal Use:

The product is ideal for all type of pastures where you are requiring quick feed but also long term nutrient release. It is designed to be applied on established or newly establishing pastures and can be applied as often as every 3 months.

Product Name	Typical Analysis @ 1 t/Ha				Recommended Spread Rate	Urea Kg/Ha	SOP Kg/Ha	Typical Applied Analysis @ Rec Rate

## REVIVE BLENDED WITH UREA

### Product Overview:

Revive Nitro Gold is designed with the dairy farmer in mind, as it contains urea that will give the pastures an added nitrogen boost as well as a long term nitrogen release. The blend will provide near instant results and will generate increased growth rates and lush green pastures within a short time frame. The product at high % rates should be treated like urea and follow the same withholding periods.

### Ideal Use:

The product is ideal for all type of pastures where you are requiring quick feed but also long term nitrogen release. It is designed to be applied on established or newly establishing pastures and can be applied as often as every month.

Product Name	Typical Analysis @ 1 t/Ha				Recommended Spread Rate	Urea Kg/Ha	Revive Kg/Ha	Typical Applied Analysis @ Rec Rate

## REVIVE BLENDED WITH SOP FINES

### Product Overview:

This product is ideal for pastures, lucerne and high producing fodder crops like maize. Applied at low % rates it provides the soil with ideal levels of potassium for dairy soils that is likely to last around 6 months. Applied at the high % rates, it is perfect for lucerne and maize crops that require high levels of potassium. As the product contains SOP, you are applying low levels of chloride and one of the safest form of potassium.

### Ideal Use:

Ideal for all types of pastures and crops and well suited for lucerne and high producing fodder crops like maize. Can be applied on the surface or incorporated in before planting. Ideal for dairy pastures as a 6 monthly blend providing the soils with all of its potassium.

Product Name	Typical Analysis @ 1 t/Ha				Recommended Spread Rate	SOP Kg/Ha	Revive Kg/Ha	Typical Applied Analysis @ Rec Rate			
	N	P	K	S				N	P	K	S
Revive Fodder Gold 2%	17.60	8.80	14.30	7.40	2500 Kg/Ha	50	2450	44.00	22.00	35.75	18.50

## REVIVE BLENDED WITH GYPSUM

### Product Overview:

Perfect for the farmer who wants to improve the quality of their soils and provide it with additional sulphur. As the product contains gypsum as well as Revive Compost, this product is designed to increase your soils calcium levels and provide much needed sulphur which can increase the plants ability to fight diseases.

### Ideal Use:

Ideal for all types of pastures and crops and well suited for canola. It can be applied on the surface or incorporated within the soil. Revive Calci Max is also safe to apply if planting potatoes, due to its neutral pH as well as adding necessary calcium for the crops requirements.

Product Name	Typical Analysis @ 1 t/Ha				Recommended Spread Rate	Gypsum Kg/Ha	Revive Kg/Ha	Typical Applied Analysis @ Rec Rate

## REVIVE BLENDED WITH QUICK GROW

### Product Overview:

The Revive Pasture Gold is designed to apply all the pastures nutrient requirements in one application. With the addition of watersoluble phosphorus and potassium, it provides available P & K as well as the benefit of long term release of nutrients. This blend will provide rapid results and will generate increased growth rates and increases of stored nutrients within the soil, but still maintain pasture production over a period of time.

### Ideal Use:

The product is ideal for all type of pastures where you are requiring quick uptake of nutrient. It is designed to be applied on established or newly establishing pastures and can be applied as often as every 3 months.

Product Name	Typical Analysis @ 1 t/Ha				Recommended Spread Rate	Fert Kg/Ha	Revive Kg/Ha	Typical Applied Analysis @ Rec Rate			
	N	P	K	S				N	P	K	S
Revive Pasture Gold 1-1	12.80	17.40	98.20	44.20	500 Kg/Ha	145	355	6.40	8.70	49.10	22.10

## REVIVE BLENDED WITH DARRIMAN K LIME 10%

### Product Overview:

This product is ideal for pastures, lucerne and high producing fodder crops like maize. Applied at low % rates it provides the soil with ideal levels of potassium and calcium for dairy soils that is likely to last around 6 months. Applied at the high % rates, it is perfect for lucerne and maize crops that require high levels of potassium as well as calcium. With the incorporation of lime, this is a great all-round product suitable to most farming systems.

### Ideal Use:

Ideal for all types of pastures and crops and well suited for lucerne and high producing fodder crops like maize. Can be applied on the surface or incorporated in before planting. Ideal for dairy pastures as a 6 monthly blend providing the soils with all of its potassium and calcium requirements.

Product Name	Typical Analysis @ 1 t/Ha				Recommended Spread Rate	SOP Kg/Ha	Lime Kg/Ha	Typical Applied Analysis @ Rec Rate
