

Maryvale Lime is renowned for being one of the highest quality Ag Limes in Victoria.

Originating from the Australian Paper Manufacturing in Maryvale, its production process allows for repeatable and predictable high quality fine ground limestone for years to come.

Due to its high level of calcium and superior neutralising value, this quality lime is a perfect soil conditioner that will help reduce your soil acidity and will provide your soil with the calcium that it requires.

By applying Maryvale Lime, availability of essential plant nutrients is increased and improvements in plant health and growth are continually achieved.

## TYPICAL ANALYSIS

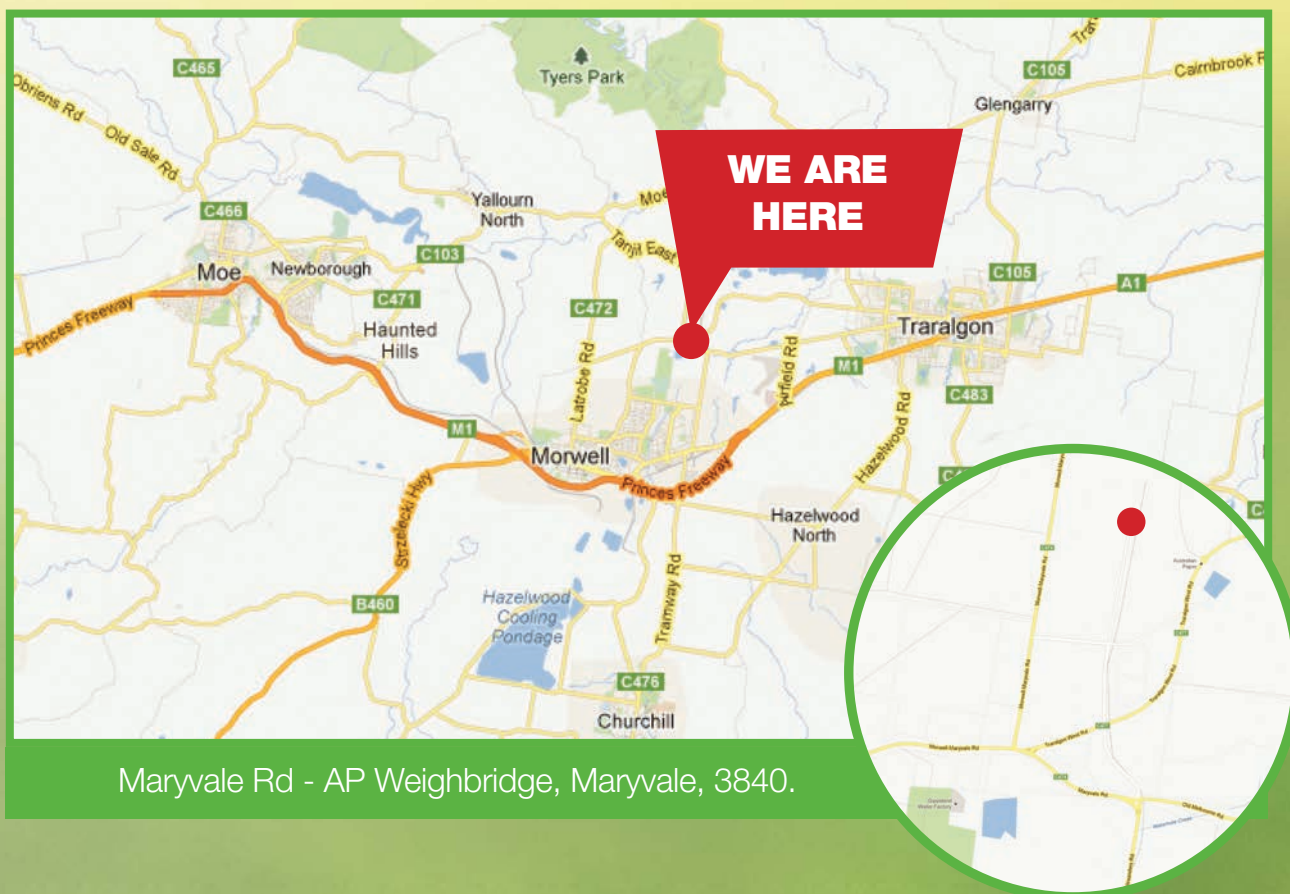

Calcium Carbonate Equivalent	CaCo3	102.75%
Calcium	Ca	41.1%
Magnesium Carbonate Equivalent	MgCo3	0.89%
Neutralising Value NV Calculated		103.8%
Effective Neutralising Value - ENV		98.82%
Moisture		12%
Nitrogen	ppm	448
Phosphorus	ppm	4840
Potassium		0.0619%
Sulphur	ppm	0.104
Sodium		0.834%
Manganese	ppm	65
Zinc	ppm	8.69
Copper	ppm	2.22
Cobalt	ppm	0.3
Boron	ppm	4.37
Molybdenum	ppm	0.138
Magnesium		0.253%
Cadmium	ppm	Nill
Lead	ppm	Nill
Mercury	ppm	Nill
